FULL STACK DEVELOPER | ☎ +91 9109200353 | ✉ singhratik07@gmail.com | [in ratiksingh](https://www.linkedin.com/in/ratiksingh)

WORK EXPERIENCE

INFOSYS: Sr. System Engineer - Full Stack Developer

July 2024 – Present

- Developed micro-frontend architecture using Angular and Go, improving scalability and load performance across 10+ SaaS apps.
- Implemented **GraphQL** APIs and RESTful services, reducing latency by 70% and enhancing real-time data fetching.
- Collaborated with cross-functional teams to revamp data pipelines, reducing redundancy by 30% and improving access speeds.
- Integrated performance monitoring and custom metrics dashboards, enabling real-time tracking of API throughput, latency, and error rates, leading to a 25% improvement in incident resolution times.
- Led requirement analysis and feature development for core modules, contributing to the successful launch of 3 major platform enhancements used by over 5,000+ end users.
- Collaborated with QA and product teams to resolve 20+ production-critical bugs, improving overall system stability.
- Designed and implemented an SMTP-based alerting system for CI/CD pipeline failures, reducing debugging turnaround time by 60% and improving build reliability.
- Delivered knowledge transfer (KT) sessions to 5+ newly onboarded developers,

INFOSYS: System Engineer - DevSecOps Engineer

Jan 2024 – June 2024

- Engineered CI/CD pipelines using Harness to automate Salesforce development and deployment, reducing deployment time by 50% and ensuring consistency across 10+ enterprise releases.
- Modernized legacy deployment systems by migrating 100% of SFDX commands to Salesforce CLI (SF), enhancing compatibility with the latest Salesforce toolset.
- Authored custom shell scripts for Git Delta automation, improving metadata tracking accuracy in package.xml and reducing manual errors by 60%.
- Monitored and supported deployment pipelines, proactively finding failures and performance bottlenecks to ensure smooth release workflows.ng deployment time by 50% and ensuring consistent delivery across 10+ releases.

INFOSYS: System Engineer - Full Stack Developer

Nov 2022 – Dec 2023

- **Responsive React SPA:** Reduced page load times by approximately 40% and increased user engagement by around 25%.
- **RESTful API Design:** Streamlined front-end and Java back-end communication, cutting configuration job processing times by 50%.
- **CRUD Operations with Spring Boot:** Improved backend development, boosting operational efficiency by 30%.
- Employed Bootstrap MUI to ensure consistent visual experience across devices, reducing bounce rates by about 15%.

PROJECTS

FoodAdda – Food Delivery App (React, Redux, Axios, MUI, Tailwind CSS)

[GitHub](#)

- Conceptualized Swiggy-inspired responsive web application using React.js and Redux for global state management.
- Utilized **React Hooks** (useState, useEffect, useContext, useReducer) for clean component logic and lifecycle management.
- Integrated **Axios** for real-time API data fetching and improved error handling mechanisms.
- Designed modern UI components using **Material UI** and custom styles with **Tailwind CSS** for pixel-perfect responsiveness.
- Implemented routing, cart logic, and dynamic rendering to simulate real food ordering workflows.

EDUCATION

Bachelor of Technology (B. Tech) - CE

MITS University, Gwalior, India | Aug 2018 – June 2022 | CGPA: 7.2

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Go, SQL

Frontend Technologies: Angular, React.js, Redux, HTML5, CSS3, SASS, Bootstrap, Tailwind

Backend Technologies: Node.js, Express.js, Java Spring Boot, GoLang

Databases: MongoDB, SQL, Firebase, MySQL,

DevOps and CI/CD: Docker, Kubernetes, Jenkins, Harness CI/CD, Git, GitHub, GitLab, GitOps, Azure

Tools and Platforms: JIRA, Confluence, Postman, Swagger, Visual Studio Code, IntelliJ IDEA

Other Skills: Microservices, Agile Methodologies, Unit Testing, API, Cloud Computing, Web Development, System Design, Communication, Teamwork, Problem Solving, Responsive design.

AWARD & ACHIEVEMENTS

- Elevated coding proficiency by tackling 500+ diverse Data Structures and Algorithms (DSA) problems across Leetcode, HackerRank, and GeeksforGeeks, becoming the go-to resource for complex algorithm debugging.
- Received **Client Appreciation** for timely and high-quality deliverables on enterprise-grade projects.
- Awarded **INSTA Award** at Infosys for building ServiceNow plugins for the Live Engineering Platform.
